Meeting Notice

Date: November 16, 2021

Time: 6:00 PM

Location: Morgan County Library, 600 North Hunter Street, Versailles, MO 65026

MORGAN COUNTY MISSOURI HAZARD MITIGATION PLAN UPDATE

Lake of the Ozarks Council of Local Governments (LOCLG) will be hosting a series of public meetings to gain public input into the local multi-jurisdictional hazard mitigation plan for Morgan County.

The point of a Hazard Mitigation Plan is to prepare a county and its jurisdictions for natural disasters. This is done by assessing the hazards that could happen in a city and the impacts it has on the county's property and people. This assessment is vital for communities to take action and secure funding from FEMA and SEMA.

Hazard Mitigation by definition is any actions taken to reduce or eliminate the long-term risk to human life and property from natural hazards.

It is very important that we have a good representation from across the county to ensure we have the support for the plan update in each local community.

We look forward to developing a comprehensive and effective Hazard Mitigation Plan to serve our local needs.

For more information about the planning process or copies of our current plan, please call LOCLG at 573-346-5692.

If you have any questions, or need any special accommodations for the meeting, please call us.

Public Workshop -- Meeting Notice

Date: Wednesday, July 20, 2022

Time: 6:00 P.M.

Location: Morgan County Library, 600 N Hunter Street, Versailles, Missouri 65084

MORGAN COUNTY MISSOURI HAZARD MITIGATION PLAN UPDATE

Lake of the Ozarks Council of Local Governments (LOCLG) will be hosting the third meeting of a series of public meetings to gain public input into the local multi-jurisdictional hazard mitigation plan for Morgan County.

The meeting is planned for Wednesday, July 20, 2022 at 6:00 p.m. at the Morgan County Library. This meeting is slated to discuss the risks and natural hazards that have had an impact on Morgan County. Each identified natural hazard will be measured for probability and severity. Mitigation actions from the current plan will be evaluated along with discussions about any new mitigation actions. Each jurisdiction and the public are encouraged to attend, as we will be discussing risk assessment-measures of probability and severity.

Missouri has experienced twenty-three natural disasters declarations in the past twenty years. These natural disasters can lead to loss of life, property damages, loss of essential services, loss of critical facilities and economic disruption. The time and money spent on recovering from a natural disaster can also exhaust additional resources both personally and community wide. Morgan County recognizes the impact of these disasters on our communities and is taking a proactive approach to updating our Hazard Mitigation Plan. Through the planning process, we hope to make our communities more resilient.

Hazard Mitigation by definition is any actions taken to reduce or eliminate the long-term risk to human life and property from natural hazards.

It is very important that we have a good representation from across the county to ensure we have the support for the plan update in each local community.

We look forward to developing a comprehensive and effective Hazard Mitigation Plan to serve our local needs.

For more information about the planning process or copies of our current plan, please call LOCLG at 573-346-5692.

If you have any questions, or need any special accommodations for the meeting, please contact us.

Subject: Invitation to Provide Comment - Morgan County Hazard Mitigation Plan

Good afternoon,

Lake of the Ozarks Council of Local Governments is finalizing the update of the 2023 Morgan County Hazard Mitigation Plan.

The purpose of hazard mitigation is to reduce or eliminate long-term risk to people and property from hazards. Morgan County participating jurisdictions and school/special districts developed this multi-jurisdictional local hazard mitigation plan update to reduce future losses from hazard events to Morgan County and its communities and school/special districts. The plan and the update were prepared pursuant to the requirements of the Disaster Mitigation Act of 2000 to result in eligibility for the Federal Emergency Management Agency (FEMA) Hazard Mitigation Assistance Grant Programs.

An open public involvement process is essential to the development of an effective plan. In order to develop a more comprehensive approach to reducing the effects of natural disasters, the Lake of the Ozarks Council of Local Governments would like to offer an opportunity for neighboring communities, local and regional agencies involved in hazard mitigation activities, and agencies that have the authority to regulate development, as well as businesses, academia and other private and non-profit interests to be review the Hazard Mitigation Plan and provide feedback.

The 2023 Morgan County Plan can be found here: <https://www.marktwaincog.com/morgan-county-hmp>

Thank you,

Devyn Campbell
